

The Blue Tornado and The Aliens

BY

Deep in space in a far
away place there was a blue
tornado. A space archerfish
sprayed water and knocked
something out of the
tornado. It was a piece
of a planet it tore up.

The piece
of planet
hit the
archerfish.

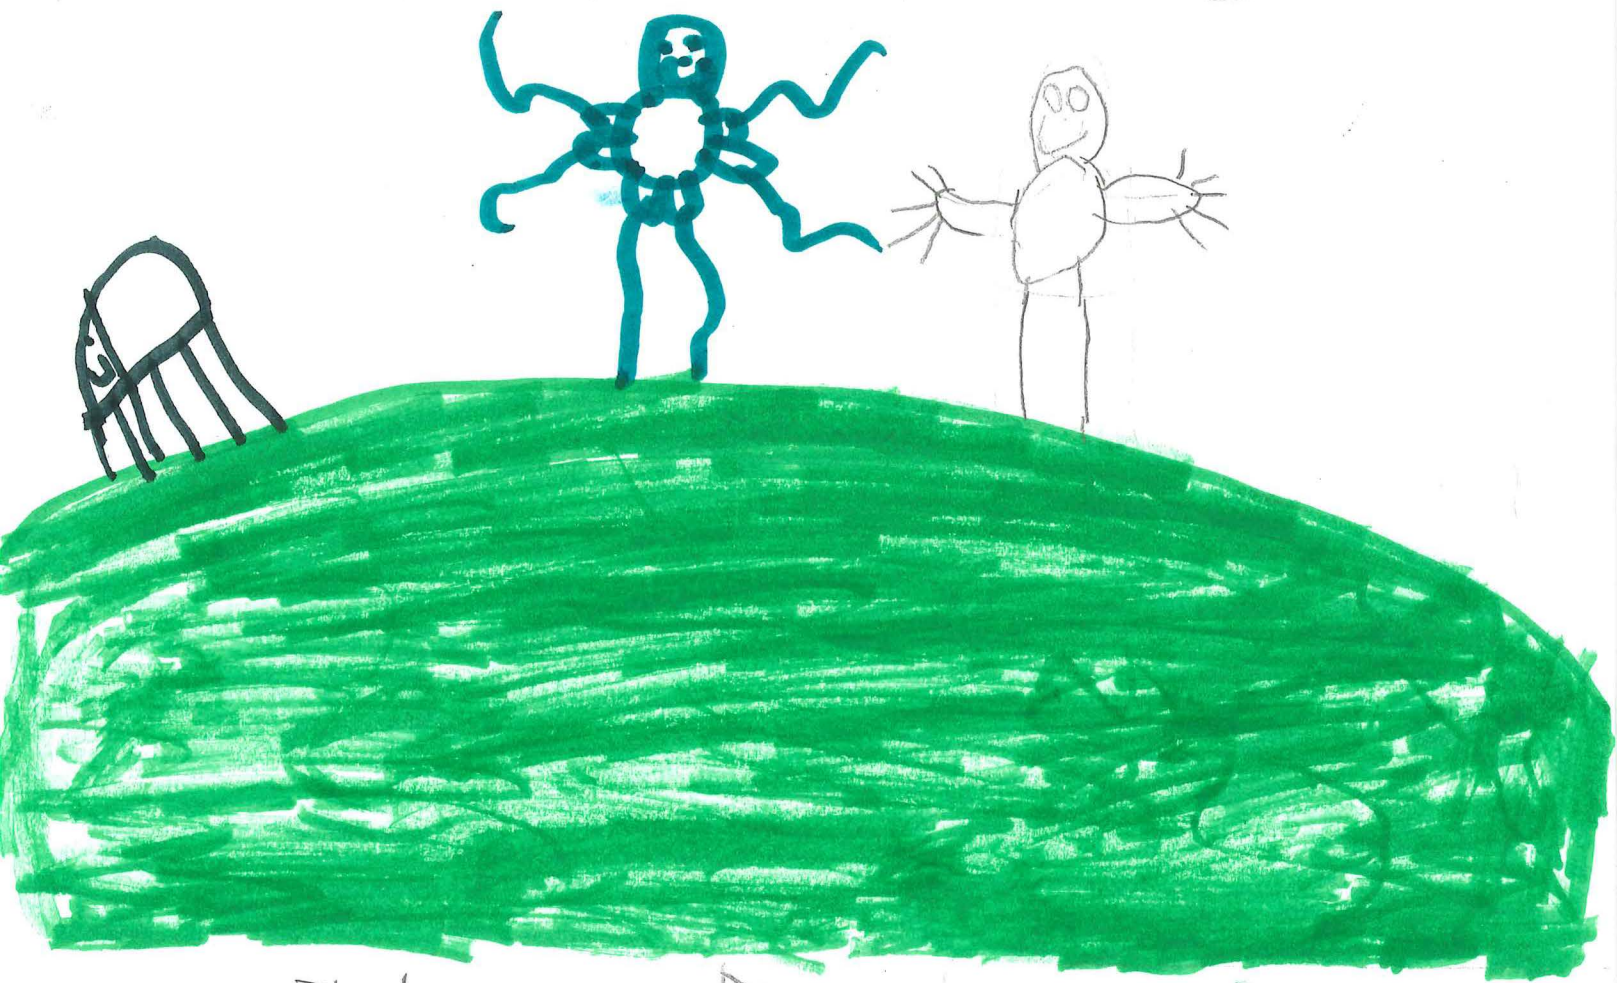

The archerfish sprayed water out again. It hit a planet and the planet wobbled out of orbit. The planet crashed into another planet and that planet went into a black hole.

The black hole teleported
aliens from the planet,
except for a tiny
beetle, to Earth.

The aliens helped out
all the people on Earth
The beetle escaped the
black hole and became a pet
for the aliens on Earth
