

The creepy castle and the knights

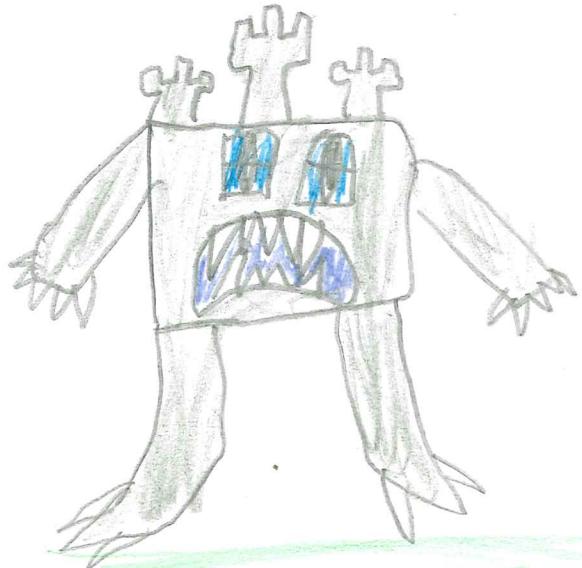

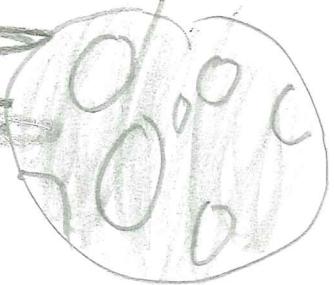

By Emmanuel zhuang

The King's Knights. The King has hired lots and lots of
Knights and is ready to take down anything, while the
haunted castle was sitting on the grass.

The creepy castle turned into a monster when it was 12:00 at midnight. And then it started to walk. It walked until it reached the King's castle.

When the castle was at the King's castle, the three knights saw the creepy castle and then they started the war.

The Knights took three days fighting the creepy castle but on the 3rd day they finally...

defeated the creepy castle. Six of them were
inside the castle while the others were out side with the
king to celebrate their victory.
